| Email Security and Management

BISMail is a complete email management and security tool. It manages and controls emails and keeps a complete audit trail of messages passing through the server.

The server is compatible with any SMTP server including Groupwise, Microsoft Exchange, Lotus Domino, Mercury and Sendmail.

Key benefits:

- Stops 99.9% security threats at the gateway before any damage is caused
- Assists with legal compliance and government regulations
- Drastically reduces internet bandwidth and costs
- Reduces email administration time and resources

- Improves employee productivity
- Accurate usage reporting and logging for multiple email systems in one place
- Individual user access to specified pages and rules

| Features of BISMail

- **Always-on:** A permanent high speed dual trunk directly into national Fibre network assures 24/7 delivery of email. Servers are constantly monitored
- **Virus Scanning:** Advanced methods are used to scan for viruses, multiple inline engines
- **Attachment Filters:** Dangerous files are stripped from email messages before being transmitted
- **Grey Listing:** A very powerful method to combat spam by testing unknown senders beforehand
- **RBL:** Real-time Black Lists are automatically updated with international databases of Spammers
- **Advanced Anti-Spam:** Bayes- & Content filters, SPF, Forward lookups and intelligent email analysis
- **Productivity:** Improves employee productivity by filtering and reducing email administration time
- **Cost effective:** Drastically reduces internet bandwidth and costs
- **Legal compliance:** Assists with legal compliance to company and government regulations (Header archive required)
- **Security:** Stops 99.9% security threats at the gateway before any damage is caused
- **Reports:** Usage summary report per month
- **Proof:** Header records and archives make it possible to account for each email transmitted. Advantageous when delivery or receipt disputes arise
- **Superior product:** With 20+ years of experience in Internet communication protocols, NCC is an authority in rendering a technically advanced product
- **Reports:** An advanced product for the serious business
